

# Provar AI - Test Failure Summary

Generated: 2025-12-17 15:47:37

## Test Case: Test\_0

Error: Exception: No elements matched the field locator. Field name: \_1 For

AI Jira Suggestion:

**Short reason:** The test failed because the field locator did not find any matching elements.

**Jira Ticket Content:**

**Title:** Test\_0: No elements matched the field locator

**Description:** During execution of Test Case: Test\_0, an exception occurred. The error message indicates that no elements were

## Test Case: Test\_1

**Steps to reproduce:**

Error: Exception: No elements matched the field locator. Field name: \_1

AI Jira Suggestion:

**Short Reason:** The test failed because the element with the locator "\_1" was not found on the page.

**Expected Result:** No error should occur and the test should pass.

**Jira Ticket Text:**

**Actual Result:** The test failed due to an exception.

**Ticket Title:** Test\_1 failure due to missing element

**Priority:** High (since it's a new test case, we want to quickly identify the root cause)

**Description:**

## Test Case: Test\_2

Test case Test\_2 encountered an error. The issue is that no elements matched the field locator "\_1". This means that the element

Error: Failed to perform interaction

**Labels:** Test\_0, Failure

**Steps to Reproduce:**

AI Jira Suggestion:

**Status:** New Test\_1

**Short Reason:** Test automation failed to interact with the application due to an unknown issue.

2. Observe the failure due to missing element

**Jira Ticket Content:**

**Expected Result:** The element with the locator "\_1" should be present and interactable on the page.

**Summary:** Test Automation Failure - Unable to Perform Interaction (Test\_2)

**Priority:** Medium

**Description:** The automated test execution for Test Case "Test\_2" has failed. Upon investigation, it appears that the test was u

## Test Case: Test\_3

**Steps to Reproduce:**

Error: Failed to connect to Master Lock Manager - assuming dead. Host: localhost, port: 50150, cause: Connection refused: getsock

AI Jira Suggestion:

2. Observe the test failing due to an inability to interact with the application.

Here is a summary of the failure in simple terms and Jira ticket content.

**Expected Result:** The test should be able to successfully perform the intended interaction with the application and complete wi

**Short Reason:** Failed to connect to Master Lock Manager due to connection refused error.

**Priority:** High

**Jira Ticket Text:**

**Components:** (Insert relevant components or modules)

**Summary:** Connection Refused Error - Unable to Connect to Master Lock Manager

**Labels:** Test Automation, Failure

**Description:** During execution of Test\_3, an error occurred while trying to connect to the Master Lock Manager on localhost at

**Steps to Reproduce:**

1. Execute Test\_3

2. Observe the connection refusal error

**Expected Result:** Successful connection to Master Lock Manager

**Actual Result:** Connection refused error with message "getsockopt"

**Priority:** High (since it's preventing test execution)

Test Case: Test\_94

Error: Unknown Error

AI Jira Suggestion:

**Short Reason:** Unexpected test failure due to unknown error.

**Jira Ticket Text:**

**Title:** Test Failure: Test\_94 - Unknown Error

**Description:**

Test Case: Test\_100

Test Case: Test\_94 has failed with an unknown error. The test case execution did not produce any specific error message or stack

Error: Unknown Error

**Steps to Reproduce:**

AI Jira Suggestion:

1. Observe the unexpected test failure

Test failed due to unknown error.

**Expected Result:** The test case should pass without any errors.

**Actual Result:** The test case failed with an unknown error.

**Jira Ticket Text:**

**Priority:** High

**Summary:** Test 100 Failure - Unknown Error

**Labels:** Unknown Error, Test Failure, Test\_94

Test Case: Test\_106

Description:

Test case "Test\_100" failed with an unknown error. Further investigation is required to identify the root cause and resolve the issue

Error: Unknown Error

AI Jira Suggestion:

**Steps to Reproduce:**

**Short Reason:** Test failure due to unknown error.

1. [Insert steps to reproduce the failure]

**Jira Ticket Text:**

**Expected Result:**

[Insert expected result]

**Summary:** Test Failure - Unknown Error in Test Case Test\_106

**Actual Result:**

Description: The test case Test\_106 failed with an unknown error. Further investigation is required to determine the root cause

Test Case: Test\_110

Error: Failed to perform interaction on element: accountTab2\_2

1. [Insert steps to reproduce the issue, if known]

AI Jira Suggestion:

**Component:** [Insert component or module affected]

**Short Reason:** The test failed to interact with the "accountTab2\_2" element.

**Labels:** test-failure, unknown-error

**Jira Ticket Content:** Test case failed with an unknown error

**Priority:** High (or Medium/Low depending on the severity of the impact)

**Summary:** Test\_110: Failed to perform interaction on accountTab2\_2 element

**Component:** [Insert component or module related to the test case]

Description: Test case Test\_110 encountered an issue while performing an interaction on the "accountTab2\_2" element. The test failed to com

**Labels:** Test Failure, Unknown Error

**Steps to Reproduce:**

- 1. Launch the application
- 2. Navigate to the relevant page where the "accountTab2\_2" element is located
- 3. Attempt to interact with the "accountTab2\_2" element

**Expected Result:** The test should be able to successfully interact with the "accountTab2\_2" element.

**Actual Result:** The test failed to perform the interaction, resulting in a failure.

**Priority:** High (since the test is failing and we need to identify the root cause)

**Assignee:** [Your Name]

**Labels:** Test\_Failure, Automation\_Test, accountTab2\_2
